September 2025

Beveridge Intermodal Precinct Project Update

The Beveridge Intermodal Precinct, to be developed in Melbourne's north, will be Australia's largest logistics precinct. The completed development will deliver a modern freight and logistics hub to Melbourne, creating thousands of local jobs.

The project is intended to be delivered in stages with the first to be completed around 24 months after final planning approvals are in place. This first stage involves the construction of a permanent rail connection to the existing Melbourne-Albury-Sydney rail freight corridor and a basic terminal with no warehousing. A second stage of the project, due for operations approximately two and a half years after planning approval, is proposed as a full-service terminal with co-located warehousing and significant road upgrades.

The project is being developed on a 1,100-hectare site along Beveridge Road, owned by National Intermodal – an Australian Government-owned entity.

Thank you for your feedback

Earlier this year, we hosted a series of community events and launched an online survey to give you the chance to learn more about the project and share your feedback.

We're grateful to the 500 community members who attended our in-person events, and to everyone who took the time to complete the online survey. Your feedback has been incredibly valuable in helping us understand what matters most to you, what topics you're interested in, and how you'd prefer to stay informed as the project moves forward.

There will be more opportunities to connect with us as the project progresses. To stay up to date with the latest news and updates, please visit **nationalintermodal.com.au** and subscribe for updates.

Site investigations underway

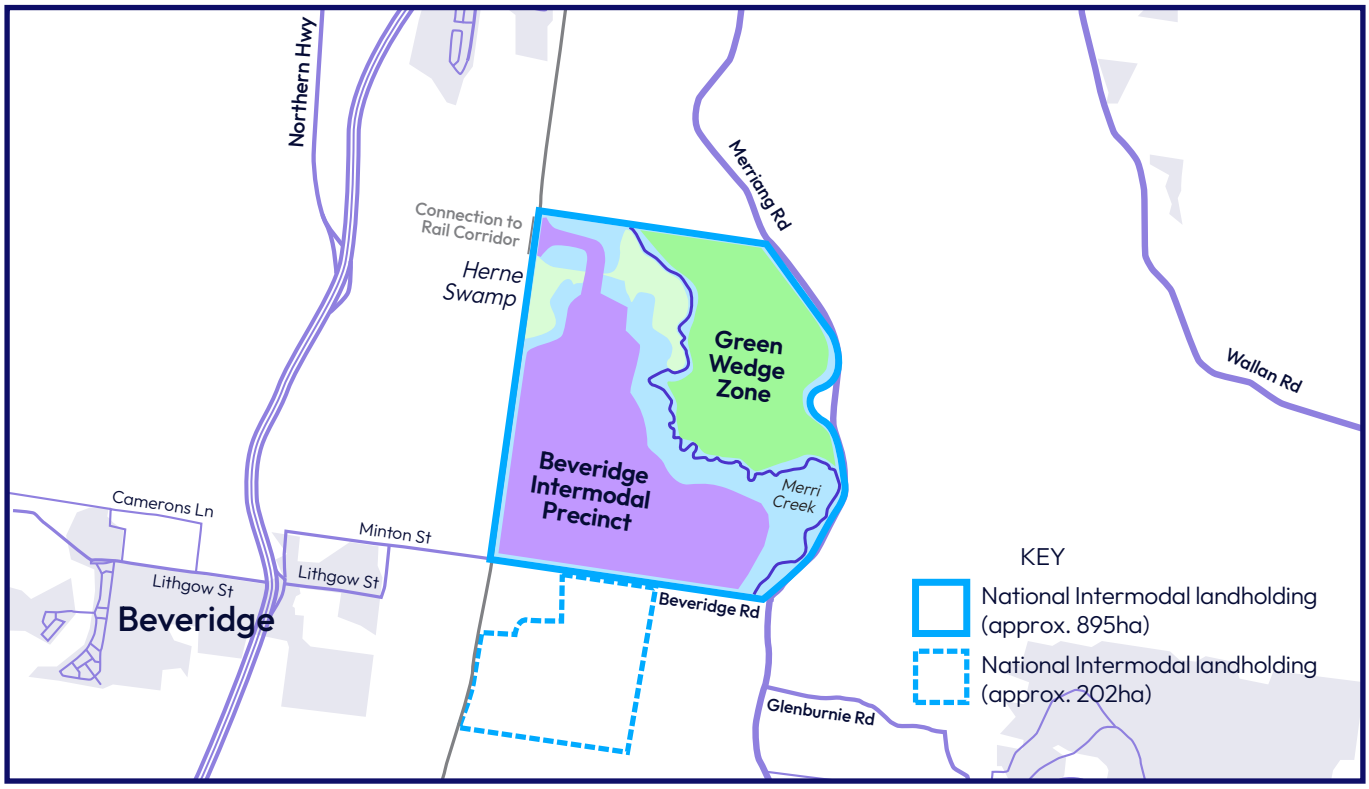

As part of preparing for the project, a range of site investigations and surveys are underway around the Beveridge Intermodal Precinct site over the coming months.

Key activities include:

- Locating underground services along Beveridge Road
- Recording the condition of local roads around the site
- Carrying out visual inspections and surveys in the area
- Testing the soil to better understand ground conditions.

These activities would generally take place between **7am and 6pm on weekdays and between 7am and 1pm on Saturdays.** To keep everyone safe, traffic management will be in place for drivers, cyclists, and pedestrians.

We may be in touch with some residents and owners with specific project information relevant to their property.
