Beveridge Intermodal Precinct

NATIONAL INTERMODAL

PROJECT UPDATE

DECEMBER 2025

We are pleased to share we are now getting ready to start works at the Beveridge Intermodal Precinct after recently receiving the last of our primary planning and environmental approvals for the project's first stage. This is an exciting milestone that marks the beginning of delivery of Australia's most advanced logistics hub.

Stage 1 includes a permanent rail connection to the existing Melbourne–Albury–Sydney freight rail corridor and a basic terminal with no warehousing. Works are expected to be completed in 2028.

With approvals now in place, you'll start to see more activity around the area as we prepare for major construction to begin in early 2026 once all necessary pre-construction approvals are in place. We have appointed John Holland Group as the main contractor for this first stage.

Future planning approvals will be sought for Stage 2, which will include a fully automated freight terminal and land for warehousing.

The project is being developed on a 1,100-hectare site along Beveridge Road, owned by National Intermodal – an Australian Government-owned entity.

What we're building

Construction of the first stage will involve:

- Building a new rail connection connecting the Beveridge Intermodal Precinct to the Melbourne-Albury-Sydney rail freight corridor
- Developing a basic terminal with container loading and unloading facilities, storage areas, and weighbridges
- Constructing new internal roads, car parking, and underground services
- Installing administration buildings, storage facilities, lighting, and rainwater tanks
- Upgrading local roads including Beveridge Road, Minton Road and the Old Hume Freeway to provide safe access to and from the precinct.

Upcoming works

Over the coming months, you may notice increased activity around the local area as we prepare for major construction to start in early 2026. Upcoming works include:

- Erecting fencing around the site
- Using large machines to level the ground
- Establishing site compound including offices, car parking and constructing internal roads
- Installation of sheds with sifting machinery to assist with heritage works

Majority of the construction works will take place within the project area. However, you may notice more noise and dust as machinery moves around the site. We will make every effort to reduce impacts on nearby homes and properties, where possible.

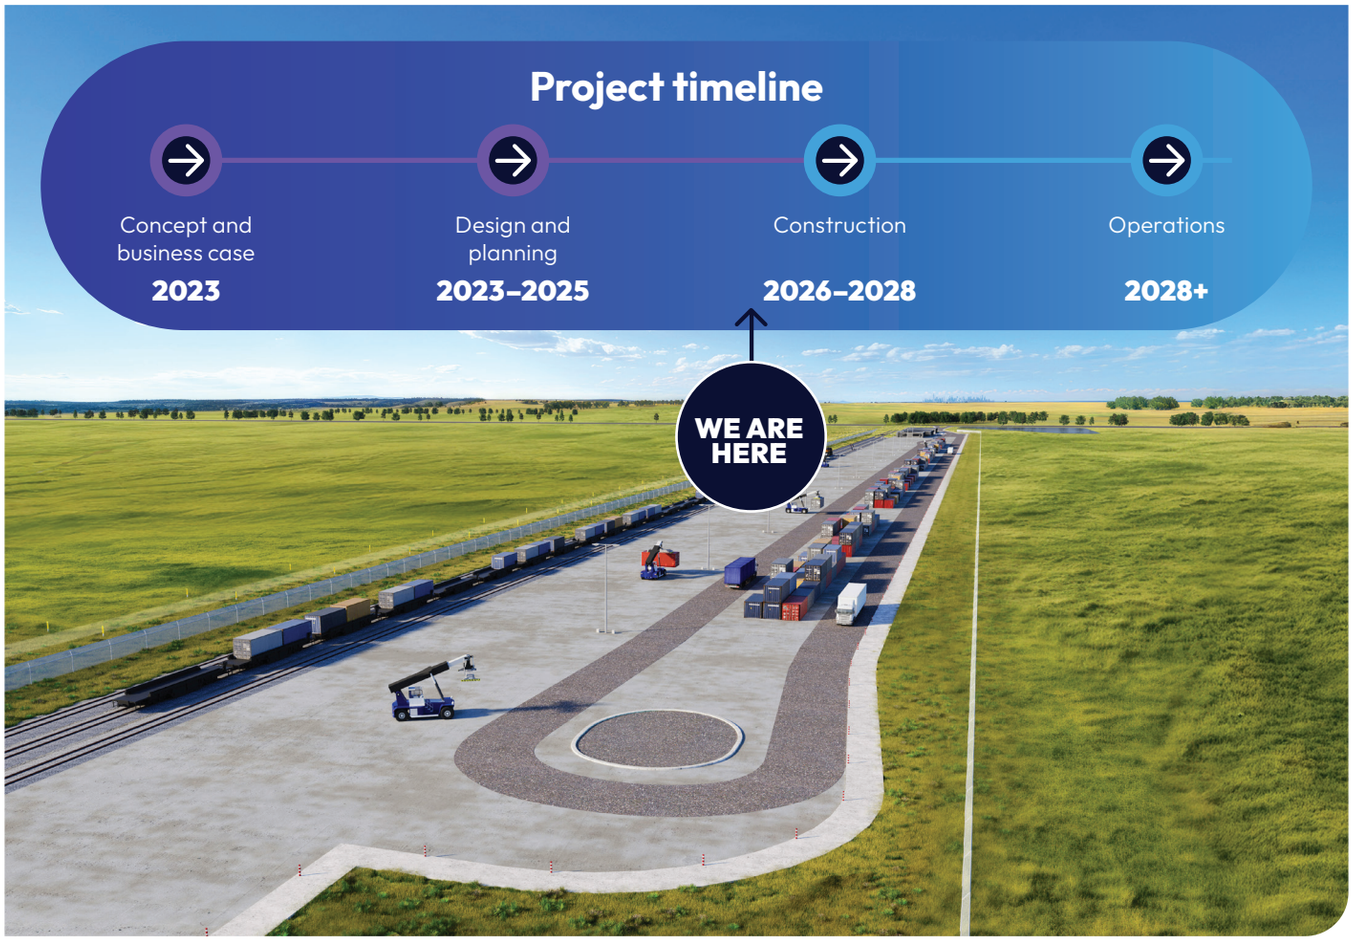

There will be more trucks using Minton Street and Beveridge Road as equipment and materials are brought to and from the site. To keep everyone safe, traffic management will be in place for drivers, cyclists, and pedestrians.

Construction hours will typically be:

- Weekdays: 7am – 6pm
- Saturdays: 7am – 1pm

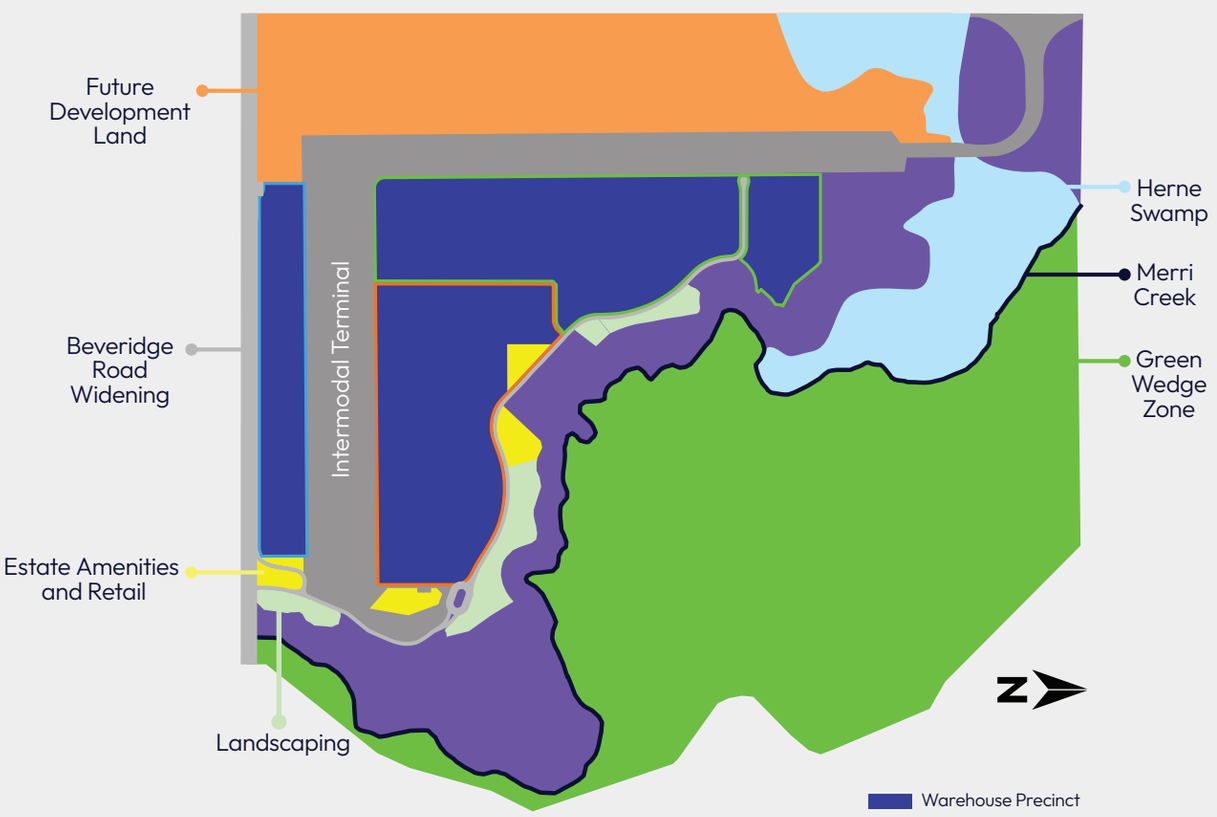

From time to time, some overnight work may be needed to reduce disruption during the day, especially to traffic.

We'll do our best to minimise construction impacts and provide information about disruptive work ahead of time through signage, works notifications and via our website.

Beveridge Intermodal Precinct

What the project will deliver

The Beveridge Intermodal Precinct will play an important role in transforming Australia's freight network. It will help make our national supply chain more efficient and reduce transport costs for businesses and families across the country.

Boost rail freight competition

Create a sustainable precinct cutting 12.1 million tonnes of CO_2 over 25 years

Deliver a logistics hub with warehousing and community facilities

Upgrade local roads to cater for future growth

Create 17,000+ associated jobs

Unlock 500 ha of green space with cultural and ecological value

Thank you for your feedback

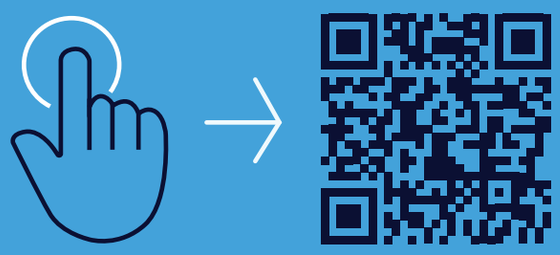

Earlier this year, we hosted a series of community events and launched an online survey to give you the chance to learn more about the project and share your feedback.

We're grateful to the 500 community members who attended our in-person events, and to everyone who took the time to complete the online survey.

Your feedback has been incredibly valuable in helping us understand what matters most to you, what topics you're interested in, and how you'd prefer to stay informed as the project moves forward.

Subscribe for updates

There will be more opportunities to connect with us and provide feedback as the project progresses. To stay up to date with the latest news and updates, please visit **nationalintermodal.com.au** and subscribe for updates.

About National Intermodal

National Intermodal is an Australian Government Business Enterprise supporting the delivery and operation of intermodal terminals on Australia's east coast to support the delivery of the Australian Government's Inland Rail project.

We develop infrastructure necessary to deliver products efficiently to Australian businesses, homes and families and to connect Australian exporters to the global market.

We support the Government's vision for an efficient and effective transport sector, as laid out in the National Freight and Supply Chain Strategy and are helping to transform Australia's supply chain by making it more resilient, efficient and sustainable.
